EIC-A-103

ANNOUNCEMENTS

Air Force Representation on the EIC, its Subcommittees and Working Groups:

Chairman, EIC, contacted Brig. Gen. Wynne, Deputy Assistant Chief of Staff, Intelligence, USAF, on 11 December '63, to determine whether or not Air Force was now in a position to provide representation on the EIC. Chairman asked whether AF still felt that it could not provide representation on the EIC or any of its SCs. Gen. Wynne responded that they did not have the manpower and competence and that they had only 7 analysts who were fully occupied in following current intelligence and "hardware" of interest to the AF. Even if representation were insisted upon, anyone attending would be unable to make a contribution. He felt that it would be unnecessarily time-consuming and non-productive. Gen. Wynne indicated that representation on the EIC Working Group on [REDACTED] was considered essential in view of the WG's collection guidance responsibilities.

Request to DIA for Detail of an Officer to [REDACTED] Staff:

25X1X4el

The Chairman of the EIC WG on [REDACTED] on which the senior DIA member is from DIA AQ 1, has suggested that the staff serving this WG in coordinating the Program here in Washington needs strengthening and that full-time assistance of an officer from the DIA would be extremely helpful. This suggestion appears to have real merit because of the large number of targets of military interest included in the guidance provided by the Program.

Chairman, EIC, by memo to Rear Adm. Samuel Frankel, USN, Chief of Staff, DIA, requested that DIA consider the detail of an officer, on a full-time basis, to [REDACTED] Staff, to assist the staff in (a) validation of requirements (targets for observation) submitted for inclusion in [REDACTED] (b) management of the production of the Program's guidance documentation; and (c) liaison with participants in the Program on the intelligence production and collection management levels in the DOD, the Department of State, and the CIA.
